Dear Dream Team,

In many cases, a thriving company will take on a newcomer as an addition to their team. Being a rookie developer, they accept the responsibility to work hard, listen, learn, and to grow. Some rise to all challenges and exceed limiting expectations, while others barely muddle through lacking the passion truly needed to absorb the knowledge and opportunity before them.

Today, it is my intention to seek the opportunity to work hard, listen, learn, and inevitably grow in contributing to your company as a full-stack JavaScript developer. My dedication and commitment to myself exceed the parameters of what is conventional because of the limitless passion I feel for software development. Not only will I strive to advance and progress for the benefit of your company but I've pledged to myself to accept nothing secondary to precision and impeccability.

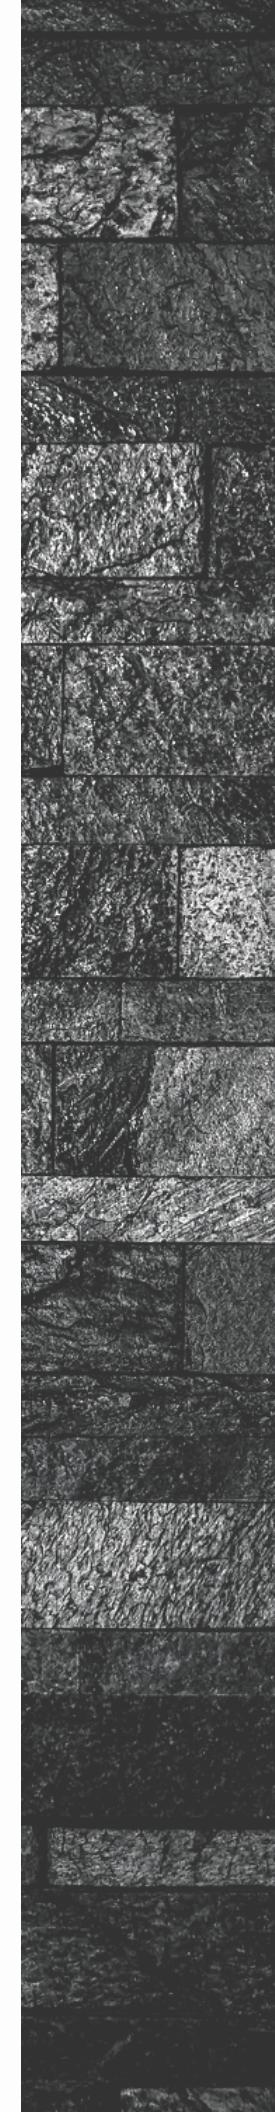

Being generously given the opportunity to pursue a career in a technical field, with discipline, perseverance, and determination I was able to become a viable asset for a major corporation as an industrial electrician. Learning alongside seasoned electrical engineers, and with no prior experience, in record time I became the youngest and first female Industrial Electrical Supervisor in a multi-billion dollar organization. I am constantly viewed as a mediator amongst peers and employers with a strong ability to articulate, communicate, and influence productivity with a highlighted focus on teamwork. As a result, I've developed strong management skills and have been solely responsible for projects with budgets ranging from \$10, 000 - \$150, 000 accumulating into millions over time.

In short, in extending this opportunity to consider my candidacy, it is exceedingly implausible that your investments will be in vain. Though my experience may be limited by time, I believe my character is the outweighing factor that will ensure my continued success. My ambition is not fueled by monetary payout, convenience, or fleeting whims. It is that of which stems from an inner child's curiosity to explore and unearth new horizons. I appreciate the time taken in reading this inquiry and am looking forward to hearing from you. Thank you.

Respectfully,  
April I. Copes

# APRIL COPIES

## Fullstack JavaScript Developer

### OVERVIEW

Hi. My name is April. Prior to pursuing a career in software development, I was an industrial electrician specializing in PLC automation and conveyor installations. Since then, I have gained vast experience with full-stack JavaScript development, frameworks and technologies. I am open to opportunities where I can contribute my knowledge and understanding into an organization in need of skilled, dedicated and goal oriented individuals.

### CONTACT

Cell: 862 279 1359  
Email: antdevelopment1@gmail.com  
Portfolio: www.aprilcopies.com  
Github: github.com/antdevelopment1  
LinkedIn: linkedin.com/in/april-copes/  
Address: Atlanta, Georgia

### SKILLS / EXPERTISE

JavaScript	Node.js
HTML5	CSS3
React	Redux
PostgreSQL	SQL
Git / Github	AJAX
RESTful API	Express
JSON	Python
Arduino .	jQuery
Communication	Perseverance
Critical Thinking .	Enthusiasm

### VOLUNTEER EXPERIENCE

Locksley Logic  
August 2018 - Present

- Provides free software development training, tutoring, and mentorship to citizens in local communities
- Formulated a business structure that utilizes in demand software/tech skills, to implement self funded charities in underserved communities

### FEATURED PROJECTS

The Pseudo Secure Initiative | <https://github.com/antdevelopment1/finalCap>  
- Arduino, C++, JavaScript, Node.js, PostgreSQL, Express, HTML, CSS, Twilio, Bcrypt  
- Fullstack Security System App utilizing an Ultra Sonic Sensor to detect an intruder's approx. distance and airwave interference.

Yum World | <https://github.com/antdevelopment1/reactFoodApp>

- HTML, CSS, Vanilla JavaScript, React, React Router
- React web app that allows the user to select a dish from around the world. This app uses a recipe API.

### PROFESSIONAL EXPERIENCE

#### FULLSTACK JAVASCRIPT DEVELOPER

WILKERSON CONVEYOR INSTALLATIONS  
(JAN 2019)

- Develops full-stack JavaScript applications for privately owned conveyor installations company
- Works with CEO and team to develop strategies to lower company overhead cost
- Integrates software to influence ease in owner/employee communication, cohesion, and growth

#### DIGITAL CRAFTS | STUDENT

16 WEEK FULLSTACK IMMERSIVE SOFTWARE DEVELOPMENT PROGRAM  
(SEP 2018 - JAN 2019)

- Experience developing full stack JavaScript applications using MEAN / MERN stack
- Experience debugging advanced JavaScript apps and developing clean code using agile methodology

#### INDUSTRIAL ELECTRICAL SUPERVISOR

WILKERSON CONVEYOR INSTALLATIONS  
(JUL 2016 - OCT 2018)

- Learned to orchestrate and effectively lead a team of industrial electricians to implement critical changes to existing electrical conveyor systems
- Advanced understanding of electrical schematics, PLC's, and I/O circuitry
- Oversaw the completion of critical system upgrades for projects with budgets ranging from \$10,000 to \$150,000+ throughout the country

### EDUCATION

Wilkerston Electrical Conveyor Installations  
Cedartown, Georgia

INDUSTRIAL ELECTRICAL APPRENTICESHIP  
ELECTRICAL ENGINEERING  
JULY 2015 - AUG 2016

- Studied how to interpret advanced electrical schematics and electrical engineering theory
- Gained experience making changes and upgrades to intricate electrical systems while complying with code and industry standards
